

Intermediate Security Concepts: Windows Server

Introduction.....	1
Exercise 1: Is This Class Right For You?.....	2
Computer Systems, Usernames, Passwords, and Addresses	6
Step 1 -- Securing the Windows Computer through Software	7
Windows NT/2000 User Accounts	8
Windows NT Groups	9
Windows 2000 Groups	10
Windows NT User Rights.....	11
Windows 2000 User Rights	12
Emergency Repair Disk	16
Configuration Modes	16
Password Crackers.....	17
Startup Scripts (Windows NT and 2000).....	18
Services.....	18
Exercise 2: Securing a Windows Workstation.....	21
Step 2 – Network Sniffers.....	25
Port Scanners and Probes.....	27
Exercise 3: Setting up a Network Sniffer and Port Scanner	28
Step 3 – Setting up a Windows Firewall.....	31
Setting up Standard Firewall Rules.....	32
Exercise 4: Setting up a Windows Firewall.....	36
Step 4 – Intrusion Detection Systems	39
Exercise 5: Using Intrusion Detection Server Snort.....	40
Step 5 -- Public and Private Key Encryption: Pretty Good Privacy (PGP)	42
General Encryption	42
Public and Private Key Encryption.....	45
Electronic Signatures	46
Exercise 6: PGP	47
Step 6 -- Detecting Abuses: Tripwire	49
Exercise 7: Tripwire.....	50

Review	54
What To Do If You've Been Compromised.....	55
CERT Coordination Center.....	55
Appendix A: Network Diagram.....	56
Appendix B: Microsoft ISA Screen Captures.....	57
