

Advanced SQL Server System Administration

Introduction.....	1
Microsoft Windows Server Trust Relationships.....	2
Steps in Creating Windows 2000 Domain Trust Relationships.....	3
Steps in Verifying a Trust Relationship.....	4
Microsoft Distributed Transaction Coordinator (MS DTC).....	5
The Two-Phase Commit Technology.....	6
Distributed Transactions Between SQL Server and Oracle.....	7
Enabling MS DTC.....	7
Properties of MS DTC.....	7
Programming MS DTC.....	8
Testing MS DTC.....	9
Monitoring MS DTC Services.....	9
The Distributed Transaction Coordinator Options.....	9
Exercise 1.....	11
Linked Servers.....	12
Advantages of Using Linked Servers.....	12
Linked Servers Details.....	13
Linked Server Basics.....	13
Querying a Linked Server.....	18
Creating a Linked Server with an Access Database Using the Enterprise Manager.....	21
Creating an Oracle Linked Server Using the Enterprise Manager.....	23
Exercise 2.....	24
Deleting a Linked Server Within Enterprise Manager.....	30
Creating Linked Servers Using Stored Procedures.....	30
Exercise 3.....	36
Remote Servers.....	38
Basic Information.....	38
Details of Remote Servers.....	38
Remote Server Setup Security.....	39
Configuring Remote Servers Using the Enterprise Manager.....	40
Viewing Local or Remote Server Properties.....	40
Viewing or Changing the SQL Server Remote Server Configuration Options.....	41
Disabling a Remote Server.....	42
Standby Servers.....	43
Basic Information.....	43
Three Phases in Implementing A Standby Server.....	43
Implementing the Three Phases of a Standby Server.....	44

Replication	47
What is Replication?	47
Transactions and the ACID Properties	47
Other Factors Affecting Data Distribution	48
Who is Responsible?	48
Database Replication Components	49
Replication Types	52
Replication Agents	55
Configuring Publishing and Distribution	57
Configuring Snapshot Replication	60
Monitoring the Activity of the Agents	74
Monitoring and Managing Replication Agents	75
Using the System Monitor to Monitor the Snapshot System	76
Calculating Replication Time	77
Disabling Replication	77
Exercise 4	79
Transactional Replication	80
The Basics	80
The Log Reader Agent	80
Transactional Replication Uses	82
Steps Involved in Configuring Transactional Replication	83
Exercise 5	94
Merge Replication	95
Basics	95
Tasks of the Merge Agent	95
Configuring Merge Replication	96
Configuring Subscriptions	98
Log Shipping	101
Monitor Server Recommendations	102
Key Points in Log Shipping Preparation and Configuration	102
Configuring Log Shipping Using the Enterprise Manager	103
Monitoring Log Shipping	112
The Log Shipping Tables	114
Determine the Maintenance Plan Used by Log Shipping	115
How to Modify or Delete Log Shipping	115
Log Shipping versus Other High-Availability Solutions	117
Appendix A: Additional Oracle Resources	119
Appendix B: OLE DB Provider Names and Information	120
Appendix C: Class Databases and Tables	121

Appendix D: Solutions to Exercises	123
Solutions to Exercise 1.....	123
Solutions to Exercise 2.....	124
Solutions to Exercise 3.....	125
Solutions to Exercise 4.....	127
Solutions to Exercise 5.....	128
