

Fundamentals of SQL Using Oracle: Level 3

What You Will Learn.....	1
Modifying Tables.....	2
Adding Columns	3
Removing Columns	3
Modifying Column Definitions.....	4
Renaming Tables	7
Renaming Columns.....	8
Exercise 1: Modifying Tables.....	10
Working with Column and Table Constraints	12
Defining Constraints	12
Creating Tables with Constraints.....	14
Adding Constraints to Existing Tables	15
Testing Constraints	16
Viewing Constraint Information	17
Disabling Existing Constraints	19
Removing Constraints.....	21
Working with Primary Keys and Foreign Keys.....	21
Testing Referential Integrity	26
Exercise 2: Working with Constraints	30
Creating Indexes	32
Creating B-Tree Indexes	32
Creating Bitmap Indexes.....	33
Viewing Your Existing Indexes.....	34
Dropping Indexes.....	34
Working with Sequences	35
Selecting Sequence Values	37
Using Sequence Values in Tables.....	38
Modifying Sequences.....	39
Viewing Sequence Information	40
Dropping Sequences	41
Using Synonyms	41
Creating Private Synonyms.....	41
Creating Public Synonyms.....	43
Resolving Redundant Object References.....	44
Exercise 3: Working with Indexes, Sequences, and Synonyms	45

Working with Users	47
Creating Users.....	47
Starting a New User Session.....	49
Working with System Privileges	51
Working with Object Privileges.....	55
Granting a Public Privilege.....	58
Using Roles to Simplify User Management	58
Viewing Privileges and Roles (Optional)	64
Changing User Options.....	65
Dropping Users	66
Exercise 4: Working with Users	67
Merging Data	69
Writing Scripts	72
Running a Script File	73
Viewing the Contents of a Script File.....	73
Editing a Script File	74
Writing Complex Scripts	74
Exercise 5: Writing Scripts	75
Appendix A: Fads Through the Decades Museum.....	76
Appendix B: SQL*Plus Commands and SQL Developer	78
Appendix C: Using the Table Pane to Modify Columns	79
Appendix D: Solutions to Exercises	81
