

Oracle Programming Using PL/SQL: Level 1

What You Will Learn.....	1
Working with PL/SQL.....	2
Understanding the Benefits of PL/SQL.....	2
Storing Your PL/SQL Code.....	3
Constructing Anonymous PL/SQL Blocks.....	3
Executing Anonymous Blocks.....	5
Exercise 1: Working with PL/SQL.....	7
Declaring Variables.....	8
Declaring Scalar Variables in PL/SQL.....	8
Initializing Variables.....	10
Declaring Constants.....	13
Using Variables in Executable Statements.....	13
Using Substitution Variables.....	16
Anchoring Scalar Variables.....	17
Understanding PL/SQL Programming Conventions.....	18
Commenting Your Code.....	19
Exercise 2: Writing Simple Programs.....	20
Selecting and Manipulating Data.....	21
Selecting Data.....	21
Manipulating Data.....	24
Controlling Transactions.....	28
Exercise 3: Selecting and Manipulating Data.....	29
Writing Conditional IF Statements.....	31
Writing IF-THEN Statements.....	31
Adding an ELSE Clause.....	32
Nesting IF Statements.....	33
Using the ELSIF Clause.....	34
Dealing with NULL Values.....	35
Using Oracle Data to Make Decisions.....	38
Exercise 4: Writing IF Statements.....	41
Using CASE Statements and Expressions.....	43
Writing Simple CASE Statements.....	43
Writing Searched CASE Statements.....	44
Understanding CASE Expressions.....	46
Using CASE Expressions with Oracle Data.....	48

Exercise 5: Using CASE Statements and Expressions.....	50
Working with Loops	51
Writing Basic Loops	51
Using WHILE Loops	56
Using Numeric FOR Loops.....	58
Using Loops to Process Oracle Data	60
Choosing the Best Loop.....	61
Exercise 6: Working with Loops	62
Working with Cursors.....	63
Managing Explicit Cursors	63
Using Cursor Attributes	67
Exercise 7: Using Explicit Cursors.....	72
Using Cursors with PL/SQL Records.....	73
Declaring PL/SQL Records	73
Fetching Data into PL/SQL Records	75
Using Cursor FOR Loops.....	76
Using Cursors with Parameters.....	77
Exercise 8: Using Cursors with PL/SQL Records	81
Handling Exceptions.....	82
Classifying PL/SQL Errors.....	82
Trapping Exceptions	83
Handling Named System Exceptions.....	83
Handling Unnamed System Exceptions.....	85
Handling User-Defined Exceptions	87
Handling Unspecified Exceptions.....	90
Using Error-Trapping Functions to Create an Error Log (Optional).....	90
Exercise 9: Handling Exceptions.....	92
Appendix A: Suggested Naming Conventions	94
Appendix B: PL/SQL Datatypes.....	95
Appendix C: Named System Exceptions.....	96
Appendix D: Fads Through the Decades Museum.....	97
Appendix E: SQL*Plus Commands and SQL Developer.....	99
Appendix F: Solutions to Exercises.....	100
