

Oracle Programming Using PL/SQL: Level 2

What You Will Learn.....	1
Working with Subprograms.....	2
Comparing Subprograms and Anonymous Blocks.....	2
Writing Modularized Code.....	3
Understanding a Subprogram's Structure.....	3
Writing Stored Procedures.....	5
Creating a New Procedure.....	5
Compiling the Code.....	7
Invoking the Procedure.....	9
Modifying and Recompiling the Procedure.....	9
Exercise 1: Writing Basic Stored Procedures.....	11
Using Parameters.....	13
Using IN Parameters.....	14
Passing Parameters to a Procedure.....	15
Assigning Default Values for IN Parameters.....	17
Using OUT Parameters.....	18
Using IN OUT Parameters.....	21
Comparing Parameter Modes.....	23
Streamlining Your Procedure.....	23
Exercise 2: Writing Stored Procedures with Parameters.....	26
Writing Functions.....	29
Developing Functions.....	29
Writing a New Function.....	30
Invoking a Function.....	32
Applying What You've Learned.....	35
Exercise 3: Writing Functions.....	37
Writing Local Modules.....	39
Declaring Local Modules.....	39
Modularizing Complex Procedures.....	40
Working with Composite Data Structures.....	43
Classifying PL/SQL's Composite Data Structures.....	43
Working with Records.....	43
Working with Associative Arrays.....	47
Exercise 4: Working with Composite Data Structures.....	53

Working with Packages	55
Understanding the Package Structure	56
Creating and Using Packages.....	57
Developing a Package Specification.....	58
Developing a Package Body	61
Referencing Packaged Elements.....	66
Testing Your Procedures.....	67
Modifying Packages.....	68
Exercise 5: Organizing Your Code in Packages.....	69
Developing More Sophisticated Packages.....	71
Understanding Package Variables	71
Initializing a Package.....	72
Making Forward Declarations	73
Overloading Subprograms	75
Using Packaged Cursors	76
Working with Built-In Packages.....	78
Designing Effective Packages.....	79
Exercise 6: Developing Sophisticated Packages.....	80
Writing Triggers.....	82
Using DML Triggers.....	82
Designing DML Triggers.....	83
Developing Statement-Level DML Triggers	83
Creating Row-Level DML Triggers	88
Creating INSTEAD OF Triggers.....	93
Creating Database Triggers.....	95
Exercise 7: Writing Triggers.....	97
Managing Your PL/SQL Applications	99
Using the DESCRIBE Command.....	99
Using Data Dictionaries.....	99
Understanding Privileges.....	102
Exercise 8: Managing PL/SQL Program Units.....	104
Appendix A: Fads Through the Decades Museum.....	105
Appendix B: SQL*Plus Commands and SQL Developer	107
Appendix C: Solutions to Exercises 1-8.....	108
