

Introduction to SQL Server Analysis Services

Introduction.....	1
OLAP Terminology	3
Terminology.....	3
Starting an Analysis Services Session	8
Navigating the Management Studio.....	9
Retrieving Data	11
Retrieving a Single, Summarized Value.....	11
Rotating Data	12
Specifying Tuple Members.....	12
Avoiding Ambiguity	13
Retrieving Multiple, Summarized Values.....	16
Specifying Tuples	16
Exercise 1: Displaying Data from a Single Measure	19
Multiple Measures	21
Using the Hierarchy	23
Default Measure.....	25
Exercise 2: Displaying Multiple Measures in One Result	27
Slicing the Cube.....	29
Filters	32
Exercise 3: Slicing the Cube by Using the WHERE Clause	34
Sorting.....	37
Exercise 4: Sorting the Data	40
Calculations.....	42
Functions.....	45
MDX Functions	45
VBA Functions	47
Formatting.....	48
Exercise 5: Calculations, Functions and Formatting	50

Appendix A: Class Data Model	52
Appendix B: OLAP versus OLTP	56
Appendix C: OLTP Data Tables.....	57
Appendix D: Web Site References	61
Appendix E: Solutions to Exercises.....	62
