

Advanced SQL Server 2008 System Administration

Setting Up the SQL Server 2008 Machines for Class.....	1
Running the NewSID Program to Modify the Computer Name and SID	1
Installing SQL Server 2008	1
Installing the AdventureWorks Sample Databases.....	7
Connect to the SQL Server Management Studio.....	8
Installing SQL Server 2008	9
Running the NewSID Program.....	9
Installing the AdventureWorks Sample Databases.....	9
Microsoft Distributed Transaction Coordinator (msdtc.exe).....	11
The Two-Phase Commit Technology	11
Monitoring MS DTC Services.....	13
Testing the MS DTC.....	16
Exercise 1.....	17
Linked Servers	18
Linked Servers Details.....	19
Linked Server Basics	19
Linked Server Performance and Considerations.....	20
Linked Server Properties.....	21
Configuring a SQL Server Linked Server Using Impersonate	24
Using the Four-Part Qualifier Method to Query the Linked Server	25
Configuring a Heterogeneous Data Source Linked Server and Mapping a Local Login to a Remote Login.....	26
Configuring a Microsoft Access Linked Server	27
Using the OpenQuery Method to Query a Linked Server	28
Ad Hoc Distributed Queries.....	30
Using the OpenRowSet Method to Query a Linked Server.....	30
Linked Server Transact-SQL Stored Procedures.....	32
Exercise 2.....	42
Replication	43
What is Replication?.....	43
Components of the Replication Technology.....	43
Subscription Types and Uses.....	46
Replication Agents.....	48
Configuring Replication.....	50
Snapshot Folder and Snapshot Folder Path	50
Sharing the ReplData Folder.....	51
Snapshot Folder Permissions	51

Configuring Snapshot Replication.....	52
Creating the Publication.....	53
Creating Pull Subscriptions.....	57
Manually Running the Snapshot Agent.....	61
Synchronizing the Data.....	61
Testing the Publication and Subscription	62
Exercise 3.....	64
Configuring Transactional Replication.....	65
Characteristics of Transactional Replication	65
When To Use Transactional Replication	65
Queued Updating	66
Creating the Transactional Publication with Updateable Subscriptions.....	66
Creating Push Subscriptions	70
Changing the Linked Server Security Information.....	73
Article Issues.....	74
Test the Subscription.....	74
Exercise 4.....	76
Configuring Merge Replication	77
Creating the Publication.....	78
Creating the Pull Subscription from the Publisher	82
Test the Subscription.....	85
Miscellaneous Replication Topics	86
Modifying the Properties of a Publication Using SQL Server Management Studio	86
Publisher Properties	87
Distributor Properties.....	87
Modifying the Password Used by Multiple Replication Agents	89
Modifying the Security Settings of the Replication Agents	89
Modifying the Distribution or Merge Agent Security Settings	89
Modifying the Account Under Which the Queue Reader Agent Runs.....	90
Modifying the Context Under Which the Queue Reader Agent Makes Connections to the Publisher	91
Manually Starting the Snapshot or Log Reader Agent	91
Replication Monitor	91
Deleting a Subscription.....	92
Deleting a Publication.....	92
Disabling Publication and Distribution.....	92
Configuring a Distributor Using the Configure Distribution Wizard.....	94
Configuring a Publisher To Use a Remote Distributor.....	96
Configuring a New Publication on a Distributor Server.....	98

Database Mirroring	99
SQL Server Editions that Support Database Mirroring	100
The Benefits of Database Mirroring	100
Database Mirroring Operating Modes	100
Transaction Safety and Operating Modes.....	101
Role Switching.....	102
Configuring Database Mirroring.....	102
Database Mirroring Notes.....	109
Mirroring Options on the Database Properties Options Page.....	109
Testing Database Mirroring	109
To Remove Database Mirroring	111
Obtaining Mirroring Status and Performance Information.....	112
Log Shipping.....	113
Log Shipping Requirements	113
Log Shipping Jobs.....	114
Log Shipping Preparation	115
Configuring Log Shipping	116
Appendix A: Host Names and IP Addresses	120
Appendix B: Class Databases and Tables.....	121
Appendix C: Providers.....	123
Appendix D: Solutions to Exercises	124
