

# Introduction to SQL Server Integration Services

Introduction to SQL Server Integration Services.....	1
Component Overview and Definitions .....	2
Getting Started .....	3
Control Flow .....	4
Data Flow and Data Flow Tasks.....	7
Activating the Data Flow Designer.....	7
Connection Managers .....	9
Parameters.....	10
Package Explorer .....	10
The SSIS Toolbox.....	11
The Solution Explorer.....	12
Properties Window.....	13
Creating a Project: The AddingColumns Project.....	14
To Create a New Project.....	14
Exercise 1 .....	29
Control Flow: Sequence Container and Conditional Split Transformation.....	30
The Sequence Container .....	30
The Conditional Split Transformation .....	30
Create the New Project: ConditionalSplitTask Project.....	31
Data Viewers.....	56
To Add a Data Viewer .....	56
Exercise 2.....	57
ProcessNewAssociations Project.....	58
Working with the ProcessNewAssociations Package.....	58
Exercise 3.....	66
SSIS Project Deployment .....	68
Creating the Integration Services Catalog (SSISDB).....	69

Logging .....	77
Configure Logging using the ConditionalSplitTask Project.....	77
To Set Logging at the Individual Container or Task Level .....	79
Appendix A: Class Setup .....	80
Appendix B: SSIS Operators .....	81
Appendix C: File Extension and Types .....	83
Appendix D: Solutions to Exercises .....	84
