

Intermediate SQL Server System Administration

What You Will Learn.....	1
Class Setup – Connecting the SQL Server to the Domain.....	2
Changing the Computer Name.....	2
Rejoining the Domain	4
Database Basics Review	5
SQL Server Databases	6
Creating User Databases in the SQL Server Management Studio.....	8
Creating Tables in the SQL Server Management Studio.....	10
Viewing and Modifying Database Properties.....	13
Viewing and Modifying Table Properties.....	15
Filegroups	16
Two Types of Filegroups.....	16
Filegroup Considerations and Rules	16
General File and Filegroup Recommendations.....	17
Create a Filegroup When Creating a New Database Using the SSMS.....	18
Add a Filegroup to an Existing Database Using the SSMS.....	19
Adding Secondary Files to a Filegroup Using the SSMS.....	20
Adding a New Table to a Filegroup Using the SSMS	21
Creating and Adding an Index to a Filegroup Using the SSMS	21
Moving an Existing Non-Clustered or Unique Index to a Different Filegroup.....	23
Moving an Existing Clustered Index or Table to a Different Filegroup.....	23
Exercise 1	25
Database Snapshots.....	26
Importing Data Using SQL Server Management Studio (SMSS)	27
Importing Text Data.....	27
Importing Microsoft Access Data.....	34
Data Compression.....	38
Row Compression.....	38
Page Compression.....	38
The sp_spaceused Stored Procedure.....	40
The Data Compression Wizard.....	41
General Data Compression Considerations	42
Row and Page Compression Considerations	42
Setting Data Compression When Creating or Altering Objects	43
Determine the Compression Setting of Each Index in the Current Database	45
Determine the Compression Setting of Each Index in all Databases.....	45

Exercise 2.....	46
Indexes and Index Performance.....	47
Pages and Extents	47
Table Scans	47
Index Scan and Index Seek.....	47
Bookmark Lookup	48
Indexes	48
SQL Server Index Structure.....	50
Clustered and Non-Clustered Indexes	51
xVelocity Columnstore Indexes.....	53
The Database Engine Tuning Advisor.....	54
The sp_helpindex Stored Procedure	62
Index Fragmentation	63
Exercise 3.....	69
Query Optimization	71
Query Optimizer	71
Query Optimization Tools	72
Overriding the Query Optimizer.....	80
SQL Server Statistics	82
When Statistics Are Created.....	82
When to Manually Create Statistics.....	82
Manually Creating Statistics Using the SQL Server Management Studio	86
Viewing Details of the Statistics.....	87
When SQL Server Updates Statistics	93
When to Manually Update Statistics.....	93
Determining the Need to Update Statistics.....	95
Updating Statistics	97
Exercise 4.....	99
SQL Server Backups.....	100
Recovery Models	100
To View or Modify the Recovery Model	100
Recovery Models and the System Databases.....	103
Backup Types and Scopes	103
Database Backup Considerations.....	105
Transaction Log Backup.....	105
Tail-of-the-Log Backups.....	106
Backup Devices	107
Creating a Logical Backup Device	107
Performing Database, Transaction Log, Differential, and File/Filegroup Backups	108
The BACKUP DATABASE Statement.....	112
Using BACKUP DATABASE and BACKUP LOG Options.....	113

The BACKUP LOG Statement.....	114
The BACKUP DATABASE Syntax When Used for File/Filegroup Backups.....	115
Backup Operation Restrictions	115
Considerations for Backing Up System Databases.....	116
SQL Server Restore Operations.....	117
General Restore Information.....	117
To Restore a Database Using the SQL Server Management Studio.....	117
To Restore a Database Using the RESTORE DATABASE Statement.....	121
To Restore Using the RESTORE LOG Statement	122
Exercise 5.....	124
Automating Database Administration.....	125
Creating Operators	125
Creating and Managing Scheduled Jobs	126
Modifying an Existing Job.....	133
Manually Starting/Stopping a Job.....	133
Managing Job Schedules.....	135
Job History	136
The Job Activity Monitor.....	136
Maintenance Plans	137
Viewing Maintenance Reports and History	154
Exercise 6.....	155
The Transaction Log File.....	156
Monitoring Log Space Use	157
DBCC OPENTRAN	157
Transaction Log Truncation.....	158
Shrinking Database Files	160
Automatically Shrinking the Database	160
Leave AutoShrink Off.....	160
Manually Shrinking the Database.....	161
Manually Shrinking Individual Database Files.....	161
Multuser Configuration (Optional).....	163
Locks.....	163
Blocking and Deadlock.....	166
Three Levels of Physical Locks	167
SQL Server Transaction Isolation Models.....	169
Appendix A: Index Considerations.....	171
Appendix B: Solutions to Exercises	174
