

Advanced SQL Server System Administration

What You Will Learn.....	1
Class Setup – Initial Setup – 1st Day.....	2
Class Setup – Connecting the SQL Server to the Domain.....	5
Changing the Computer Name.....	5
Rejoining the Domain.....	6
Linked Servers	8
Linked Server Basics	8
Linked Server Performance and Considerations.....	9
Linked Server Properties.....	10
Configuring a SQL Server Linked Server Using Impersonate	13
Using the Four-Part Qualifier Method to Query the Linked Server	14
Using the Execute Method to Query a Linked Server	16
Using the OpenQuery Method to Query a Linked Server	17
OpenQuery Method Example	18
Ad Hoc Distributed Queries.....	18
Using the OpenRowSet Method to Query a Linked Server.....	19
The sp_linkedservers Stored Procedure.....	20
The sp_helplinkedsvlogin Stored Procedure	21
The sp_droplinkedsvlogin Stored Procedure.....	22
The sp_dropserver Stored Procedure	22
Exercise 1	24
Replication	25
What is Replication?.....	25
Components of the Replication Technology.....	26
Agents	27
Articles.....	27
Publication	27
Subscriptions.....	28
Replication Agents.....	29
Configuring Replication.....	32
Snapshot Replication	33
Characteristics of Snapshot Replication	33
Snapshot Replication Advantages.....	33
Snapshot Replication Disadvantages	33
When to Use Snapshot Replication.....	33
Snapshot Folder and Snapshot Folder Path	34
Sharing the Snapshot Folder	34

Snapshot Folder Permissions	35
Configuring Snapshot Replication.....	36
Creating Pull Subscriptions.....	44
Exercise 2.....	51
Configuring Transactional Replication.....	52
Characteristics of Transactional Replication	52
When to Use Transactional Replication	52
Performance Considerations	53
Creating the Transactional Publication.....	53
Creating a Push Subscription from the Publisher	59
Test the Subscription.....	65
Exercise 3.....	66
Configuring Merge Replication	67
Subscription Types Specific to Merge Replication	67
Characteristics of Merge Replication.....	67
When to Use Merge Replication.....	68
Creating the Merge Publication	68
Creating the Push Subscription from the Publisher	74
Article Issues.....	80
Test the Subscription.....	81
Miscellaneous Replication Topics	82
Modifying the Properties of a Publication Using SQL Server Management Studio	82
Publisher Properties	83
Distributor Properties.....	83
Modifying the Password Used by Multiple Replication Agents	85
Modifying the Security Settings of the Replication Agents	86
Modifying the Subscription Properties	87
Modifying the Account under Which the Queue Reader Agent Runs.....	87
Modifying the Context with the Queue Reader Agent Connection to the Publisher.....	88
Manually Starting the Snapshot or Log Reader Agent	88
Replication Monitor	89
Deleting a Subscription.....	89
Deleting a Publication.....	89
Disabling Publication and Distribution.....	90
Configuring a Distributor Using the Configure Distribution Wizard.....	91
Configuring a Publisher to Use a Remote Distributor	93
Configuring a New Publication on a Distributor Server.....	95
Database Mirroring	96
How Database Mirroring Works.....	97

Database Mirroring Operating Modes	97
Database Mirroring Prerequisites	98
SQL Server Editions that Support Database Mirroring	98
The Benefits of Database Mirroring	99
Role Switching.....	99
Configuring Database Mirroring.....	100
Database Mirroring Notes.....	107
Mirroring Options on the Database Properties Options Page.....	107
Testing Database Mirroring	107
Manual or Forced Failover.....	108
Database Mirroring Monitor	109
Monitoring Database Mirroring.....	109
To Remove Database Mirroring	110
Obtaining Mirroring Status and Performance Information.....	112
Exercise 4.....	113
Log Shipping.....	114
Types of Servers	114
Log Shipping Requirements	115
Log Shipping Jobs.....	115
Log Shipping Preparation	116
Configuring Log Shipping	117
Exercise 5.....	122
AlwaysOn Availability Groups.....	123
AlwaysOn Availability Group Topology.....	123
Requirements, Restrictions, and Recommendations.....	123
Window Server Failover Clustering	124
Windows Failover Clustering Configuration.....	127
Enable SQL Server 2012 AlwaysOn Availability Groups Feature	130
Backup the Database(s) for the Availability Group.....	130
Create and Configure SQL Server AlwaysOn Availability Groups	131
Adding a Database to an AlwaysOn Availability Group.....	134
Reviewing the AlwaysOn Availability Group.....	135
Testing the Availability Group	136
Manual Failover (Switch Roles)	137
The Dashboard.....	138
Exercise Solutions.....	142
