

Intermediate Windows Vista Administration

Class Introduction	1
Networking Overview.....	1
Windows Vista Networking and Workstation Types	2
Windows Vista as a Network Workstation.....	2
Windows Vista Editions and Possible Workstation Types.....	2
Windows Vista Network Services	3
Introduction to Microsoft Windows Networks.....	6
Understanding Domains and Networks	6
Necessary Components for Connecting to a Microsoft Windows Local Area Network.....	6
Checking the Components Installed on the Windows Vista Computer.....	8
To View or Modify the Properties on an Installed Component.....	9
To Remove an Installed Component.....	9
Connecting to a Microsoft Windows Local Area Network	10
An Alternative Method to Connect to the Domain Computers	11
Connecting to a Workgroup.....	11
Setting Up a New Wireless Network	11
Windows Vista Ad Hoc Network	14
Uses of Ad Hoc Networks	14
Setting Up an Ad Hoc Network.....	14
Windows Vista Network Discovery	17
Network Diagnostics.....	20
Exercise 1: Connecting to a Domain	21
Windows Vista and UNIX Connectivity	22
Supported Protocols	22
Installing Support for NFS.....	22
To Start or Stop the Client for NFS	22
Configuring the NFS Client.....	23
Subsystem for UNIX-Based Applications (SUA)	23
Performing a Custom Installation of Subsystem for UNIX-Based Applications (SUA).....	24
If the SUA Stops Responding	25
SAMBA	26
Telnet	27
Windows Vista and Macintosh Connectivity	28
A Brief Look at the Windows Vista Boot Options	29

The Boot Configuration Data (BCD) Store	30
Opening the Command Prompt with Elevated Privileges	30
Setting Extended Privileges	30
To Edit the BCD Store	31
BCD Back Ups.....	32
The Performance and Reliability	33
Reliability and Performance Monitoring	33
To Open the Reliability and Performance Tool.....	33
The Reliability and Performance - Resource Overview Tool.....	34
The Performance Monitor Tool	36
Custom Data Collector Sets	38
The Data Collector Set Properties.....	40
To Configure Data Management for a Data Collector Set	40
Viewing Performance Monitor Log Data	42
Performance Monitor Diagnosis Report	42
Performance Monitoring Concepts	43
Scope of Performance Data	43
Reliability Monitor.....	45
To Open the Reliability Monitor.....	45
The System Stability Index.....	46
The System Stability Chart	46
The System Stability Report	47
System Stability—The Reliability Monitor	47
Exercise 2.....	50
Task Manager.....	51
To Open the Task Manager.....	51
Task Manager Tour.....	51
Comparison of Performance Monitor with Task Manager	56
Event Viewer	57
To Open the Event Viewer	57
Event Viewer Overview.....	57
Properties of the Events	59
Additional Properties of Event.....	60
Miscellaneous Log File Actions	61
How to Filter the Events in the Event Viewer	62
How to Save a Filter as a Custom View	63
How to Create a Custom View	64
How to Apply a Custom View Filter	65
Data Execution Prevention	65
To Change the Data Execution Prevention (DEP) Settings.....	65
To Enable or Disable Data Execution Prevention for Specific Programs	66

Computer Management Window	67
Microsoft Management Console (MMC)	69
Exercise 3: Performance Monitoring	71
Troubleshooting Problems with Performance Tools	72
Investigating Zero Values	72
Investigating Other Problems with Performance Tools.....	73
Backup and Restore Operations.....	74
The Back Up Files Utility	74
Changing the Back Up Files Wizard Settings.....	78
Restoring Files Using the Restore Files Wizard.....	79
The Complete PC Backup Imaging Utility	84
Restoring a Complete PC Image Backup.....	87
Windows Vista Volume Shadow Copy	89
Enabling (or Disabling) Shadow Copy Configuration.....	89
Turn On the Volume Shadow Copy Service	90
Using Shadow Copy	90
Troubleshooting	93
Troubleshooting Windows Vista Setup	93
General Troubleshooting Strategy	93
System Restore.....	97
Manually Enabling (or Disabling) the System Restore Feature	97
To Manually Create a System Restore Point	98
To Restore the System Using the System Restore Wizard.....	98
Advanced Bootup Options.....	100
Booting the Computer in Safe Mode	100
System Configuration Manager General Tab Options.....	101
The Windows Vista Disk Defragmenter.....	102
Exercise 4.....	104
Appendix A: Networking Features	105
