

Introduction to Exchange Server 2007

Class Server Setup	1
Preparing Active Directory for the Exchange 2007 Installation.....	2
Setting Up the Computer for Class	6
Installing Active Directory	6
Raising the Domain and Forest Functional Levels	8
Installing the IIS and WWW Services	8
Install Windows PowerShell.....	9
Installing Exchange 2007.....	10
Running the Best Practice Analyzer	16
Associating an Offline Address Book with a Mailbox Database	17
Installing Exchange Server 2007 Service Pack 1	19
Joining the Exchange Organization Administrator Group.....	19
How to Create the Mail Exchange (MX) Resource Record	20
How to Create the New Send Connector	20
Validating the New Send Connector using Outlook Web Access	23
Installing the Exchange Server 2007 Service Pack 1.....	24
Outlook 2007 Setup	25
Exchange 2007 Requirements.....	26
Network and Directory Servers	26
Recommended Minimum Hardware Requirements.....	27
Hotfix Requirements	28
Other Requirements	28
32 vs. 64 Bit Support	28
Exchange 2007 Editions	30
Exchange 2007 Client Access Licenses.....	31
Exchange 2007 Server Roles	32
Other Roles	32
Server Role Installation Order	33
Upgrading, Transitioning, or Migrating to Exchange 2007.....	34
Upgrading	34
Transition vs. Migration.....	34
Exchange 2007 Coexistence with Earlier Versions of Exchange Server	35
Managing a Mixed Exchange 2003, Exchange 2000, and Exchange 2007 Organization	37
Exercise 1	38

Active Directory Review	39
Active Directory.....	39
Active Directory Domains	39
Trees.....	39
Active Directory Forests	40
Active Directory Sites.....	40
Domain Controller	40
Domain Controller Operation Master Roles	41
Global Catalog	42
Active Directory Schema.....	42
Naming Context.....	42
LDAP	42
SMTP Connectors.....	42
Exchange and Active Directory	43
Exchange 2007 and Active Directory Sites	44
New Active Directory Exchange Roles	45
Exchange and DNS	47
Configuring the DNS Settings for Exchange 2007.....	47
Verifying the DNS Resource Records	47
Creating the Reverse Lookup Zone	48
Creating the Pointer Record.....	48
Configuring DNS Settings for the Edge Transport Server Role.....	49
Exchange, IIS and SMTP.....	52
Changes In Exchange 2007 Transport Architecture	53
Administrative Groups and Routing Groups	54
Client Access	55
Outlook Web Access.....	55
Exchange ActiveSync	56
The Hub Transport Server and Mail Delivery	58
POP3 and IMAP	58
The Availability Service	59
The Autodiscover Service.....	59
The Exchange Management Console.....	60
The Organization Configuration Node and SubNodes	61
The Server Configuration Node and Subnodes	64
The Recipient Configuration Node.....	65
Exchange 2007 Users, Groups and Roles.....	67
New Active Directory Exchange Roles	67
The Exchange Management Console and Active Directory Users and Computers	68

Creating an Organizational Unit	68
Creating an E-Mail Account with Active Directory Users and Computers.....	69
How to Mail-Enable an Existing User Account	70
How to Create a New Mail Enabled User in the Exchange Management Console	71
Exchange 2007 Distribution Groups.....	73
How to Create a New Mail-Enabled Distribution or Security Group Using the Exchange ...	74
Management Console.....	74
How Mail-Enabled an Existing Distribution	75
How to Create a New Dynamic Distribution Group.....	75
How to Add Distribution Group Members (Recipients).....	77
Exercise 2.....	78
SMTP Send and Receive Connectors	79
Send Connectors	79
The Four Send Connector Usage Types	80
How to Create a New Send Connector on the Hub Transport Server	81
Receive Connectors	84
How to Create a New Receive Connector on the Hub Transport Server.....	85
Allowing Anonymous Connection Considerations	88
SMTP Receive Connectors Authentication	88
Accepted Domains and Transport Rules.....	90
How to Create an Accepted Domain	90
Transport Rules – How to Create a New Transport Rule	91
Installing the Anti-Spam Transport Agents	93
Content Filtering	94
Recipient Filtering	95
Sender Filtering.....	95
Sender ID Filtering	96
Sender Reputation Filtering	96
IP Block and IP Allow Lists	97
IP Block List	98
IP Allow List.....	98
Attachment Filtering	98
Exercise 3.....	99
Message Routing.....	100
Exchange Server Email Routing.....	100
Components of the Message Transport.....	101
Hub Transport Servers	103
Message Transport Architecture.....	103

The Exchange Store	104
Changes to the Exchange Database	104
Exchange Extensible Storage Engine	104
Exchange Store Components	105
Exchange Server Replication Technologies	106
The Exchange 2007 Database (.edb) Files.....	106
The Exchange 2007 Transaction Log (.log) Files.....	106
The Exchange 2007 Checkpoint (.chk) Files.....	107
Mailbox Database and Managing Mailboxes	108
Storage Groups.....	108
How to Create a New Storage Group	109
How to Move a Storage Group	110
Mailbox Databases.....	110
Microsoft Recommendations Concerning Exchange Databases	110
How to Create a New Mailbox in the Exchange Management Console.....	111
Mailbox Database Properties	112
How to Determine the Maximum Users per Database	114
How to Move a Mailbox Database	114
Public Folders	115
Public Folder Databases.....	115
Resource Mailboxes.....	115
How to Configure a Resource Mailbox Properties	117
How to Create or Remove Custom Resource Properties	118
Storage Quotas	118
How to Configure a Mailbox Database Storage Quota	119
How to Configure an Individual Mailbox Database Storage Quota.....	120
How to Change a Mailbox Database Size Limit.....	121
Recipient Restrictions	121
How to Configure Message Size Restrictions for a Specific Mailbox	122
How to Configure Message Delivery Restrictions	122
Configuring Deleted Mailbox and Deleted Item Retention.....	123
How to Configure Deleted Item Retention for the Mailbox Database	124
How to Configure Deleted Item Retention for a User	125
How to Configure Deleted Mailbox Retention.....	125
How to Recover a Deleted Mailbox.....	126
How to Recover a Deleted Mailbox Item	126
How to Recover a Deleted Item from the Exchange Mailbox.....	127
How to Remove a Mailbox Database	129
How to Mount or Dismount a Database	129
How to Allow Mailbox Access – Granting the Full Control Mailbox Permission.....	130
How to Grant the Send As Permission for a Mailbox	130
Backup and Restore Operations.....	132
Four Backup Types	132
How to Perform a Basic Backup of the Exchange Databases	133

Message Relay	134
How to Allow Relay Exceptions.....	134
Testing for Open Relay	135
How to Modify the Send Connector Default Banner.....	135
Monitoring Exchange 2007 Performance	137
Factors Affecting the Exchange Server Performance	137
Performance Monitoring.....	137
Recommended Performance Counters.....	139
Appendix A: Host Names and IP Addresses	142
Appendix B: Exchange 2007 Components.....	143
Appendix C: Exercise Solutions	147
