

Intermediate Applications of Visio 2010

Introduction.....	1
Importing Special Graphics Formats	2
Importing AutoCAD Drawings.....	2
Creating Hyperlinks	5
Creating a Link to Another Page in the Same File	5
Following Hyperlinks	7
Linking to a Web Page.....	7
Linking and Embedding Objects	8
Linking Content	8
Embedding Objects.....	11
Exercise 1	12
Understanding Structured Diagram Elements	13
Working with Callouts.....	13
Working with Containers.....	15
Understanding Shape Data.....	19
Adding Shape Data for the Default Properties	20
Creating Custom Shape Data Fields	21
Linking Shapes to External Data	23
Establishing a Link to a Data Source.....	23
Linking External Data Shapes	27
Refreshing Linked Data	30
Removing Data Graphics.....	31
Exercise 2.....	32
Creating Shape Reports.....	33
Creating a Shape Report	33
Creating Custom Reports.....	35
More Tools for Network Diagrams.....	39
Color-Coding with Data Graphics	41
Exercise 3.....	44
Accessing the Developer Tools	45
Understanding Shape Behaviors and Protection.....	46
Understanding Shape Protection.....	46

Viewing a Shape’s Default Behaviors	48
Customizing Shapes with Protection and Behavior.....	49
Changing Shape Names	52
Customizing Stencils	53
Understanding Quick Shapes.....	53
Creating New Stencils.....	54
Adding Shapes to Stencils	56
Editing a Custom Shape Master.....	58
Deleting a Stencil.....	59
Exercise 4.....	60
Creating Custom Templates.....	61
Creating a New Template	61
Saving the File as a Template	68
Creating a File Based on a User Template.....	69
Exercise 5.....	70
Finding More Shapes Online	71
Appendix A: Using Geographic Shapes	72
Appendix B: Solutions to Exercises	74
