

# Intermediate Applications of Visio

What You Will Learn.....	1
Importing Special Graphics Formats .....	2
Importing AutoCAD Drawings.....	2
Creating Hyperlinks .....	6
Creating a Link to Another Page in the Same File .....	6
Following Hyperlinks .....	8
Linking to a Web Page.....	8
Linking and Embedding Objects .....	9
Linking Content .....	9
Embedding Objects.....	12
Exercise 1 .....	14
Understanding Structured Diagram Elements .....	15
Working with Callouts .....	15
Working with Containers .....	16
Understanding Shape Data.....	20
Adding Shape Data for the Default Properties .....	21
Creating Custom Shape Data Fields .....	22
Linking Shapes to External Data .....	25
Establishing a Link to a Data Source.....	25
Linking External Data Shapes .....	28
Refreshing Linked Data .....	31
Removing Data Graphics.....	32
Exercise 2.....	33
Creating Shape Reports.....	34
Creating a Shape Report .....	34
Creating Custom Reports.....	35
More Tools for Network Diagrams.....	41
Color-Coding with Data Graphics .....	43
Exercise 3.....	47
Accessing Developer Tools .....	48
Understanding Shape Behaviors and Protection.....	49
Understanding Shape Protection.....	49

Viewing a Shape’s Default Behaviors .....	50
Customizing Shapes with Protection and Behavior.....	51
Changing Shape Names .....	55
Customizing Stencils .....	56
Understanding Quick Shapes .....	56
Creating New Stencils.....	57
Adding Shapes to Stencils .....	60
Editing a Custom Shape Master.....	62
Deleting a Stencil.....	64
Exercise 4.....	65
Creating Custom Templates.....	66
Creating a New Template .....	66
Saving the File as a Template .....	72
Creating a File Based on a User Template.....	73
Exercise 5.....	74
More Shapes.....	75
Finding Shapes Online .....	75
Creating a New Master Shape.....	75
Appendix A: Using Geographic Shapes .....	76
Appendix B: Solutions to Exercises .....	79
