

# Intermediate C Programming

Programming in C .....	1
Portability .....	1
Defining Your Own Functions .....	2
<i>Exercise 1: User-Defined Functions</i> .....	4
Return Values from Functions .....	5
Passing Two Values to a Function .....	5
<i>Exercise 2: Multiple Function Arguments</i> .....	7
Preprocessor Macros .....	8
Advantages of Macros .....	9
<i>Exercise 3: Preprocessor Macros</i> .....	10
Include Files .....	11
Filters .....	12
getchar() .....	12
<i>Exercise 4: Character Input</i> .....	13
putchar() .....	14
CTYPE Functions .....	18
<i>Exercise 5: Character Output</i> .....	19
User-Supplied Functions .....	20
Pointers .....	23
Defining Pointers .....	23
Pointers in Expressions .....	25
Using a Pointer to Change the Value of a Variable .....	26
<i>Exercise 6: Introduction to Pointers</i> .....	27
Pointers and Arrays .....	28
Pointers and Strings .....	30
String Manipulation Functions .....	31
Incorrect Use of a Pointer .....	33
Pointer Arithmetic .....	34
<i>Exercise 7: Pointers</i> .....	35
An Array of Pointers .....	36
<i>Exercise 8: Advanced Pointers (Optional)</i> .....	37
Data Types .....	38
C Program Memory Utilization .....	39
Global Variables .....	39
Static Variables .....	40

Structures .....	42
Defining a Structure .....	42
Referencing Structure Elements .....	43
Structure Examples .....	44
Bit Fields in Structures.....	46
Unions .....	47
<i>Exercise 9: User-Defined Data Types</i> .....	48
Appendix A: Summary of Operators in the C Language.....	49
Arithmetic Operators .....	49
Relational Operators .....	49
Logical Operators.....	49
Assignment Operators.....	50
Appendix B: Rules of Precedence .....	51
Appendix C: Formatted Input .....	52
Appendix D: Formatted Output .....	54
Appendix E: Loading and Using the C Compiler.....	56
Starting the Compiler.....	56
Customizing the Environment .....	56
Setting up the Screen .....	56
Debugging.....	57
Command Line Arguments.....	57
Appendix F: Keyboard Shortcuts.....	58
Appendix G: ASCII Tables.....	59
Appendix H: C Programming References .....	62
