

# Introduction to Perl Programming

Introduction.....	1
What is Perl?.....	2
Getting Started With Perl.....	2
Understanding Perl Basics .....	4
Beginning to Program with Perl .....	5
Creating a Template.....	5
Using the Print Statement .....	7
Using Variables.....	9
Using <STDIN>.....	10
Numbers.....	12
Strings .....	14
Exercise 1.....	15
If Statement.....	16
Conditional Operators.....	16
Logical Operators.....	17
Formatting Reports .....	18
Report Format Structure .....	18
Exercise 2.....	21
Loops.....	22
Loop Control.....	22
While Loop .....	22
Until Loop.....	22
For Loop.....	23
Foreach Loop .....	23
Exercise 3.....	24
Pattern Matching.....	25
Extended Attributes for Perl Regular Expression.....	25
Regular Expression .....	26
Grouping .....	29
Other Options to Pattern Matching.....	29
Split Operator.....	30
Search and Replace .....	30
Exercise 4.....	31

Basic Arrays.....	33
Exercise 5.....	38
Hashes or Associative Arrays.....	39
Assigning Values to an Associative Array.....	39
Keys Operator.....	40
Values Operator.....	40
The Each Operator.....	41
Adding to an Associative Array.....	41
The Delete Operator.....	42
Exercise 6.....	43
Advanced Arrays.....	45
Summary Exercise (Optional).....	47
Appendix A: Perl in Comparison to Other Programming Languages.....	48
Appendix B: Pattern Matching.....	50
Appendix C: Additional Resources.....	52
Appendix D: Solutions to Exercises.....	53
