

Intermediate Perl Programming

Introduction.....	1
Creating a Template.....	1
Subroutines	2
Arguments.....	3
Exercise 1.....	6
File Access and Manipulation.....	8
Testing Files.....	8
Accessing a File	8
Directory Access and File Manipulation	13
Exercise 2.....	14
Introduction to Packages, Modules, and Pragas	16
Packages.....	16
Modules.....	17
Pragma	19
Exercise 3.....	20
Connecting to Databases.....	21
System Configuration	21
Perl Database Interface	21
DBI Connection Example.....	22
Automatic Error Reporting	24
Fetching Data.....	25
Creating ODBC Connections.....	26
Setting Up a DSN.....	27
Connecting to a Database using ODBC.....	27
Exercise 4.....	31
Modifying Tables Using SQL Statements in Perl	32
Additional Statements.....	32
Counting Rows.....	33
Inserting Records	34
Updating Records.....	35
Deleting Records.....	36
Exercise 5.....	37

Web Interfaces	38
Receiving the Data.....	38
Processing the Data.....	39
Using the CGI Module.....	39
Using CGI with Database Connections	41
Exercise 6.....	43
Appendix A: Meta Characters	44
Appendix B: Solutions to Exercises	45
