

Introduction to Visual Basic .NET Programming

| | |
|---|----|
| Learning Microsoft Visual Basic | 1 |
| Using Visual Studio 2010 | 2 |
| Creating a New Visual Basic Project..... | 3 |
| Navigating the Visual Studio 2010 Environment | 4 |
| Designing a Graphical User Interface..... | 6 |
| Working with Objects | 7 |
| Working with Form Properties | 8 |
| Adding Controls to a Form | 12 |
| Setting the Control's Properties | 13 |
| Adding Code to Your Application..... | 20 |
| Viewing the Code Editor | 20 |
| Understanding the Structure of a Visual Basic Program | 20 |
| Understanding Event-Driven Programming | 21 |
| Handling Button Click Events | 22 |
| Running a Visual Basic Program..... | 26 |
| Running the Program | 26 |
| Debugging the Application..... | 26 |
| Using Text Boxes to Receive Text Input..... | 27 |
| Working with Text Boxes at Design Time | 27 |
| Retrieving Text Box Entries at Runtime..... | 29 |
| Exercise 1: Writing Simple Programs..... | 30 |
| Working with Local Variables..... | 33 |
| Declaring Local Variables | 33 |
| Specifying the Variable's Type | 33 |
| Naming Variables | 35 |
| Assigning Values to Variables..... | 36 |
| Working with Numeric Data..... | 37 |
| Converting Strings to Numeric Data..... | 37 |
| Performing Mathematical Operations..... | 38 |
| Using Constants | 39 |
| Converting Numeric Values to Strings | 40 |
| Formatting Strings | 40 |
| Using the Keyboard to Run a Button's Default Event..... | 41 |
| Exercise 2: Working with Numeric Data..... | 42 |
| Using If Statements to Make Decisions..... | 44 |
| Writing Simple If Statements..... | 44 |

| | |
|---|-----|
| Writing If...Else Statements | 47 |
| Using ElseIf to Handle Multiple Conditions | 48 |
| Working with Complex Conditions | 50 |
| Using Message Boxes | 52 |
| Understanding the MsgBox() Function | 52 |
| Displaying an Error Message in the Price Calculator Application | 53 |
| Responding to Message Box Input | 55 |
| Try...Catch Block | 57 |
| Exercise 3: Writing If Statements | 59 |
| Writing Loops | 61 |
| Writing Do While Loops | 61 |
| Writing For Loops..... | 66 |
| Exercise 4: Writing Loops | 69 |
| Using Combo Boxes | 71 |
| Adding a Combo Box to a Form..... | 72 |
| Understanding the Items Collection..... | 72 |
| Adding Items During Design Time..... | 72 |
| Allowing Text Entries..... | 73 |
| Responding to Combo Box Events..... | 74 |
| Retrieving Information about the Selected Item..... | 75 |
| Writing Select Case Statements | 78 |
| Using Case Else Statements..... | 79 |
| Exercise 5: Using Combo Boxes | 81 |
| Working with Arrays | 83 |
| Understanding Instance Variables | 84 |
| Declaring an Array Variable..... | 84 |
| Assigning Values to Array Elements..... | 85 |
| Using Loops to Process Array Elements | 86 |
| Generating Random Numbers..... | 88 |
| Using Radio Buttons, Check Boxes, List Boxes, and Track Bars | 89 |
| Using Radio Buttons to Change Text Color | 90 |
| Working with Fonts | 93 |
| Using Check Boxes to Change the Font Style | 94 |
| Using a List Box to Change the Font Name | 96 |
| Using a Track Bar to Change the Font Size..... | 98 |
| Exercise 6: Using Additional Controls | 100 |
| Appendix A: Solutions to Exercises | 102 |
