

# Intermediate Applications of Excel 2010

|  |    |
|--|----|
| Course Objectives .....  | 1  |
| Working with Multiple Worksheets.....                                  | 2  |
| Naming Sheets .....  | 2  |
| Selecting Multiple Sheets (Grouping Sheets) .....                      | 3  |
| Entering Data in Multiple Sheets .....                                 | 4  |
| Inserting New Worksheets.....  | 5  |
| Deleting Sheets .....  | 6  |
| Moving and Copying Sheets.....   | 6  |
| Changing the Default Number of Sheets .....                            | 8  |
| Exercise 1 .....   | 10 |
| Naming Cells and Ranges.....   | 12 |
| Rules for Naming Cells and Ranges .....                                | 12 |
| Creating a Named Range or Named Cell.....                              | 13 |
| Viewing a Named Range or Named Cell.....                               | 14 |
| Using a Name in a Formula .....  | 15 |
| Using the Name Manager Dialog Box.....                                 | 16 |
| Rounding Numbers .....   | 18 |
| Using the ROUND Function.....  | 19 |
| Exercise 2.....  | 20 |
| Working with Conditional Functions.....                                | 21 |
| Using the COUNTIF Function.....  | 21 |
| Using the SUMIF Function.....  | 22 |
| Exercise 3.....  | 23 |
| Using the IF Function .....  | 25 |
| Exercise 4.....  | 29 |
| Exercise 5 (Optional) .....  | 30 |
| Visualizing Excel Data with Conditional Formatting.....                | 33 |
| Using Data Bars to Visualize Data .....                                | 33 |
| Using Color Scales.....  | 34 |
| Using Icon Sets .....  | 35 |
| Applying Special Formatting to Cells that Contain Certain Values ..... | 36 |
| Applying Conditional Formatting Based on a Formula.....                | 37 |
| Exercise 6.....  | 38 |

|   |    |
|---|----|
| Using Functions on Noncontiguous Areas .....                        | 39 |
| Designing Effective Spreadsheets.....                               | 40 |
| Laying Out Your Worksheets Effectively .....                        | 40 |
| Making Your Spreadsheets Easy to Read.....                          | 41 |
| Using the NA Function to Avoid Errors .....                         | 43 |
| Protecting Constants and Formulas .....                             | 44 |
| Creating Templates .....  | 48 |
| Designing the Template .....  | 48 |
| Saving a Template.....  | 49 |
| Using the Template .....  | 50 |
| Modifying the Template .....  | 51 |
| Deleting a Template.....  | 51 |
| Creating a New Workbook from an Existing Workbook .....             | 52 |
| Documenting Your Spreadsheet .....                                  | 53 |
| Exercise 7.....   | 54 |
| Final Project (Optional) .....                                      | 55 |
| Appendix A: Moving and Selecting Keystrokes .....                   | 58 |
| Appendix B: Precision as Displayed.....                             | 60 |
| Appendix C: Using the Conditional Formatting Rules Manager.....     | 61 |
| Appendix D: Using Top/Bottom Rules for Conditional Formatting ..... | 64 |
| Appendix E: Solutions to Exercises.....                             | 65 |
