

Special Topics in XML: Intermediate XML and ASP

Course Introduction and Objectives	1
XML Background and Concepts	1
XML Components and Terminology.....	1
Displaying an XML Document in the Browser	2
Viewing XML Data in a Browser.....	2
Working With XML Data Within an ASP Page.....	4
Viewing XML Data That Has Been Included Within an ASP Page.....	5
Viewing XML Data as a File System Object	6
Transforming a Recordset to XML Format	7
Displaying the XML Data in the Browser	7
Writing the XML Data to a File.....	15
Exercise 1.....	18
Converting an XML File to a Recordset.....	20
Using the Open Method of the RecordSet Object to Display the Data	20
Using the Open Method of the RecordSet Object to Insert New Records	22
Exercise 2.....	24
Transferring Data with the Document Object Model (DOM)	25
Displaying a Simple Server Response in the Caller Page	26
Displaying a Server XML File in the Caller Page	27
Displaying Server SQL SELECT Results in XML Format in the Caller Page	28
Exercise 3.....	31
Appendix A: XML Files	32
MYCDS.XML	32
INVOICE.XML	32
Appendix B: Utility Programs	33
ADO Constants	33
Path Definintions	34
Recordset Data Types	35
Appendix C: Data Table Structures	36
Mydust Table	36
Mycds Table	36
Customer Table.....	36

Appendix D: Recordset Properties and Methods.....	37
Properties of the Recordset Fields Collection.....	37
Methods of the RecordSet Object.....	37
Appendix E: Student List.....	39
Appendix F: Solutions to Exercises.....	40
Solutions to Exercise 1	40
Solutions to Exercise 2	46
Solutions to Exercise 3	51
