

# Advanced Power BI: Level 3

What You Will Learn.....	1
Data Modeling .....	2
Planning a Star Schema Data Model .....	2
Data Modeling Basics .....	3
Converting a Flat File into a Star Schema Data Model .....	4
Creating a Single-Field Dimension.....	4
Merging with the Fact Table.....	7
Creating a Multi-Field Dimension .....	9
Refreshing the Data Model .....	10
Creating a Date Key.....	10
Data Model Properties .....	12
Table Properties .....	12
Field Properties .....	13
Field Property Groups.....	16
Exercise 1 .....	18
Adding a Second Fact Table.....	19
Shared Dimensions .....	19
Custom Data Model Views.....	20
Exercise 2.....	22
Advanced Time Intelligence.....	23
Week-Over-Week Analysis .....	23
Parallel Period Analysis.....	25
Creating a Cumulative Total.....	25
Same Period Last Year.....	27
Working with Multiple Relationships.....	28
Create the Measures.....	29
Combining Results with Union, Intersect, and Except.....	30
Union Function .....	30
Intersect Function.....	31
Except Function .....	32
Exercise 3.....	33
Mismatched Tables: Data Mashup.....	34
Appending from a Single Workbook.....	34
Appending from Files in a Folder (Optional) .....	37

Exercise 4.....	41
Report Navigation.....	42
Navigation Buttons .....	42
Navigation Tables.....	44
Custom Visualization.....	47
Import a Custom Visual .....	47
Custom Composite KPI .....	49
Appendix A: Solutions to Exercises .....	51
