

Introduction to Java Programming

What You Will Learn.....	1
Getting Started with Java.....	2
Understanding Java’s Benefits.....	2
Learning an Object-Oriented Language.....	3
Writing Your First Program.....	4
Choosing a Text Editor.....	4
Defining a New Class.....	8
Writing the <code>main</code> Method.....	11
Displaying Output.....	12
Understanding Coding Rules and Conventions.....	13
Adding Comments to Your Programs.....	14
Compiling and Running Java Applications.....	15
Compiling and Running our Code.....	15
Checking the Results.....	15
Interpreting and Correcting Compilation Errors.....	16
Exercise 1.....	17
Working with Variables.....	18
Declaring Variables.....	18
Understanding Primitive Types.....	20
Assigning Values to Variables.....	22
Concatenating Output.....	27
Incrementing and Decrementing Variable Values.....	29
Working with Constants (Final Variables).....	32
Taking Command-Line Arguments.....	35
Exercise 2.....	39
User Input.....	40
Using if Statements to Make Decisions.....	43
Writing Simple <code>if</code> Statements.....	43
Writing <code>if-else</code> Statements.....	45
Using <code>boolean</code> Variables.....	46
Using the Conditional Operator (Optional).....	47
Using <code>else if</code> to Handle Multiple Conditions.....	48
Working with Complex Conditions.....	50
Understanding Nested <code>if</code> Statements.....	52
Declaring Variables Inside a Block.....	54
Putting It All Together (Optional).....	55

Exercise 3.....	57
Writing switch Statements.....	59
Using a break Statement.....	61
Using a default Statement.....	62
Combining if and switch Statements.....	63
Exercise 4.....	65
Working with Loops (While and Do).....	66
Writing while Loops.....	66
Using a Counter.....	68
Writing do Loops.....	69
Exercise 5.....	71
For Loops.....	72
Using a Reverse Counter.....	73
Monthly Activity.....	74
Controlling the Flow of Loops.....	75
Nesting Loops.....	77
Exercise 6.....	78
Working with Numbers.....	79
Using the API Documentation.....	79
Using the Math Methods.....	83
Converting Between Types.....	88
Exercise 7.....	90
Working with Strings.....	91
Comparing Two Strings for Equality.....	91
Methods (Functions).....	92
Changing Case.....	93
Performing More String Comparisons (Optional).....	93
Determining String Length.....	95
Working with Substrings.....	95
Finding a Character in a String.....	96
Exercise 8.....	98
Using Arrays.....	99
Declaring an Array Variable.....	99
Creating the Array.....	99
Assigning Values to Array Elements.....	100
Testing Array Length.....	102

Working with Command-Line Arguments	102
Copying an Array.....	103
Using Arrays Methods	105
Designing a Pick 3 Lottery	108
Exercise 9.....	110
Classes and Objects.....	111
Appendix A: Solutions to Exercises	113
