

Advanced Java Programming

What You Will Learn.....	1
Getting to Know the Swing Package	2
Comparing Swing and the AWT.....	2
Working with Swing Packages	3
Understanding Swing Components	3
Creating a Top-Level Container	6
Importing the Swing Package	6
Defining the Frame Class.....	6
Setting up the Frame	7
Testing Your Application	11
Working with Swing Components.....	13
Creating New Component Objects	13
Creating a Container	16
Adding Components to the Container.....	17
Setting Up the Content Pane	17
Customizing GUI Components.....	19
Exercise 1	20
Handling User Events	22
Working with the AWT's Listener Interfaces	22
Implementing the ActionListener Interface	23
Registering the Listener on a Component.....	24
Writing the Event-Handling Code	25
Handling Events from Multiple Sources.....	28
Handling Window Events	30
Using an Adapter Class.....	32
Exercise 2	35
Handling Exceptions.....	36
Understanding the try...catch Syntax	36
Using a Predefined Exception Message.....	37
Including a finally Block	38
Handling Multiple Exceptions	38
Laying Out Your Interface Effectively	39
Using FlowLayout	40
Finding the Frame's Preferred Size	40
Setting a Component's Preferred Size	40
Using Absolute Positioning (Optional).....	41

Using GridLayout	42
Setting Borders.....	44
Using BorderLayout (Optional).....	44
Using Multiple Layouts to Create a Sophisticated Interface	47
Exercise 3	58
Creating a Format Dialog Box	59
Changing Text Color.....	61
Using Radio Buttons to Change Foreground Color	62
Working with Fonts	67
Using Check Boxes to Change Font Style.....	68
Using a Slider to Change Font Size	70
Using a Combo Box to Change the Font Name.....	73
Exercise 4	77
Creating a Text Editor.....	79
Working with Menus	80
Setting Up Toolbars	83
Working with Text Areas.....	85
Creating Custom Dialog Boxes	88
Exercise 5	92
Working with Input and Output.....	93
Reading from Files.....	93
Writing to Files	96
Using the JFileChooser Class	98
Appendix A: Solutions to Exercises	104
