

# Advanced Python Programming Level 2

What You Will Learn.....	1
Anaconda’s Jupyter Notebooks .....	2
Using JSON .....	3
JSON Serialization and Deserialization.....	3
Conversion Types .....	4
How to Handle Objects that JSON Cannot Serialize.....	6
Multiple Objects, Unknown Order .....	7
Pandas and JSON.....	10
Exercise 1 .....	11
How to Parse XML Files .....	12
What is XML .....	12
Reading an XML File .....	13
Writing an XML File .....	15
Exercise 2 .....	19
Web Pages.....	20
Creating an HTML File .....	20
Crawling Web Pages.....	20
Blocking Crawlers .....	25
Pandas Scraping.....	25
Read_html.....	25
To_html.....	25
Exercise 3.....	26
BeautifulSoup .....	27
Start Program .....	27
Scraping a Web Page .....	29
Getting the Links.....	30
Tables.....	31
Exercise 4.....	33
Graphical User Interfaces .....	34
Tkinter.....	34
Creating a GUI Application.....	34
GUI Programming Tasks .....	35
Control Variables .....	39
Exercise 5 .....	42

More GUIs .....	43
Multiple Frames .....	43
Colors .....	44
Event Bindings.....	45
Menu .....	47
Spawned Windows.....	49
Exercise 6 .....	50
Creating and Using API .....	51
What is an API.....	51
API Example #1 .....	51
API Example #2.....	52
Using APIs.....	53
Status Code .....	53
API Arguments .....	54
Solutions to Exercises.....	56
