

Introduction to Power Pivot

What You Will Learn.....	1
What is Power Pivot?	2
Activating the Power Pivot Add-in.....	3
Preparing Data for Power Pivot Import	4
Creating the Power Pivot Data Model	5
Importing by Creating a Linked Table.....	6
Importing Using Copy and Paste from Excel	7
Importing Using the Table Import Wizard	8
Importing Data with a SQL Query.....	13
Navigating the Power Pivot Tabs	15
Power Pivot Ribbon	15
Updating Linked Tables.....	16
Formatting Imported Data.....	17
Exercise 1	18
Data Relationships	19
Methods for Creating Data Relationships.....	19
PivotTables in Power Pivot.....	23
Creating a PivotTable	23
Creating a Flattened PivotTable.....	26
Exercise 2.....	27
Creating a PivotChart.....	28
Creating Multiple Pivot Charts	29
Creating a PivotChart Slicer	31
Exercise 3.....	32
Creating Calculated Columns	33
Renaming Calculated Columns.....	34
Formatting Calculated Columns	35
Using Autocomplete in Formulas	36
Using Calculated Columns in a PivotTable	37
Working with the RELATED Functions	38
RELATED: The “many to one” Function	38
RELATEDTABLE: The “one to many” function	39

Exercise 4.....	40
Creating Measures	41
Creating Measures from Other Calculations.....	44
Creating Measures Directly in Power Pivot.....	44
Creating a Simple Data Model.....	45
Appendix A: Solutions to Exercises	46
