

Intermediate Excel VBA

What You Will Learn.....	1
Creating User Input Forms.....	2
Creating the Input Form.....	2
Adding Fields to the Form.....	4
Adding VBA to a Form Control.....	8
Working with Additional Controls.....	11
Exercise 1.....	17
Working with Arrays.....	18
Understanding Array Types.....	18
Reading a Range into an Array.....	21
Using an Array to Populate an Excel Form ComboBox.....	21
Exercise 2.....	23
Interacting with PivotTables in VBA.....	24
Refreshing PivotTables through VBA.....	24
Using Custom Data Sorts in PivotTables.....	25
Limiting PivotTable and PivotField Options.....	30
Using Macros with PivotTable Report Filters.....	34
Cleaning Up the Workbook after PivotTable Use.....	38
Exercise 3.....	44
Using VBA to Manipulate Excel Charts.....	45
Managing Sizing and Positioning of All the Charts on a Worksheet.....	45
Setting Chart Series Colors to Match Source Cell Colors.....	46
Creating a Set of Charts that are Disconnected from the Source Data.....	49
Exercise 4.....	52
Using SQL Commands in Macros for External Data.....	53
Retrieving Data from a Database.....	53
Connecting with Your Data Source.....	53
Opening the Data Source.....	54
Retrieving Data from a Table.....	55
Placing the Retrieved Records in the Current Worksheet.....	59
Exercise 5.....	62
Using Excel VBA with Other Office Applications.....	63
Calling a Macro Inside Another Office Product.....	69

Exercise 6.....	72
Cleaning Up Data through VBA.....	73
Fixing Problems with Numerical Data Stored as Text	73
Trimming Spaces and Non-Printing Characters	74
Replacing Blank Cells with a Value	75
Setting a Consistent Length on Cell Values	76
Appendix A: Additional User Form Strategies.....	79
Appendix B: Automating Email Actions through Macros	84
Appendix C: Solutions to Exercises	87
